

OLAR ANTIFREEZE G11 READY TO USE

Utilization

OLAR ANTIFREEZE G11 READY TO USE is an extended service life OAT (organic Acid Technology) formula that protects cooling systems. It's a phosphate, nitrite, silicate and borate-free coolant which uses proprietary organic corrosion inhibitors to provide wet sleeve liner cavitation and corrosion protection of all cooling system metals.

Customer Proposition

- It works well in conformity with all sealing elements and does not harm engine metals and hoses
- It prevents formation of corrosion and electrolysis. It increases the efficiency of the cooling system for a longer engine life
- It contains premium additives against corrosion, calcification and foaming
- It is compatible with all cooling system materials including aluminum and steel radiators

Characteristics

Meets the following specifications	
G11 READY TO USE	
Typical Properties	
Test Parameters	Typical Values
Appearance	Clear
Color	Upon preference
Density, 20 °C	1,080
pH (%50 v/v)	7-9
